README

Ilan Golik

June 2022

1

In order to re-run the project put the next folders all together with the project code as it is presented in the next picture.

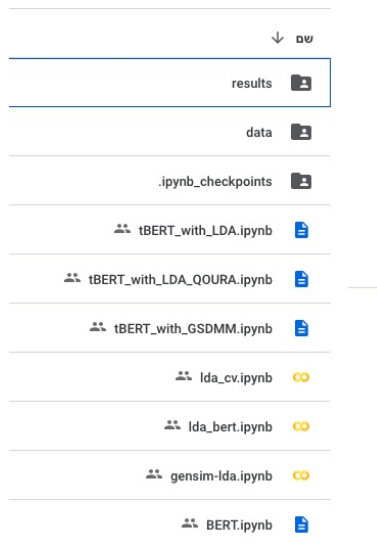

Figure 1: Expected project structure

1. Put the empty folder named 'results' in the same folder where are the project notebooks.

2. Put the data folder in the same folder where are the project notebooks.

3. Please download data from the next location

   - Our shared drive -
     link to the google drive project folder

4. It is expected to have the msrp data in the next location relatively to the project notebooks

   - `data/MSRP/MSRParaphraseCorpus/`

5. It is expected to have the quora data in the next location relatively to the project notebooks

   - `data/Quora/Quora_question_pair_partition'`
